*For
Food
Fun
Health*

And It's Economical!

*Your
Own
Garden*

THINK of it—culling your supper from your own backyard! The vegetable bill for the month at zero dollars! Moreover, it's so delightful to tend a garden, to spend pleasant hours in the bright sunshine, to watch the garden grow from tiny seeds to big wholesome fruits and vegetables, to glorious flowers. This catalogue will help you select the best adapted seeds and plants at economical prices.

How to Order — Guarantee

TO AVOID MISTAKE OR MISUNDERSTANDING PLEASE READ
THIS PAGE BEFORE ORDERING

We absolutely guarantee perfect satisfaction and if on receiving your order or later you feel that you have not received full value in every way let us know and we will either refund your money or make other restitution. But remember no one is perfect; if we make a mistake and you do not let us know and give us a chance to make it right, you have no one to blame but yourself.

If it becomes necessary, we reserve the right to change these prices but if they are advanced we will notify you before delivering.

If sold out of the variety ordered (unless you instruct us to the contrary) we will substitute with the nearest we have.

All seeds delivered at the prices quoted on plants and other items, delivery charges are given.

TERMS: Cash, check, money order or *two* and *three* cent stamps.

We positively stand back of everything we put out but for your protection as well as ours and to comply with the law;—we give no warranty express or implied as to description, quality or productiveness of any seeds, bulbs or plants we sell and we will not be in any way responsible for the crop. If you do not accept them on these terms return them at once and get your money back. **CLAYTON E. RISLEY**

WHOLESALE PRICES

To florists, market gardeners or those who grow for profit and who use large quantities, we are glad to quote special prices.

SPECIAL CLUB ORDERS

We make a liberal discount to organizations, or for neighborhood club orders. Write for our terms.

SPECIAL TO JUNIOR PROJECT or 4-H CLUB WORKERS

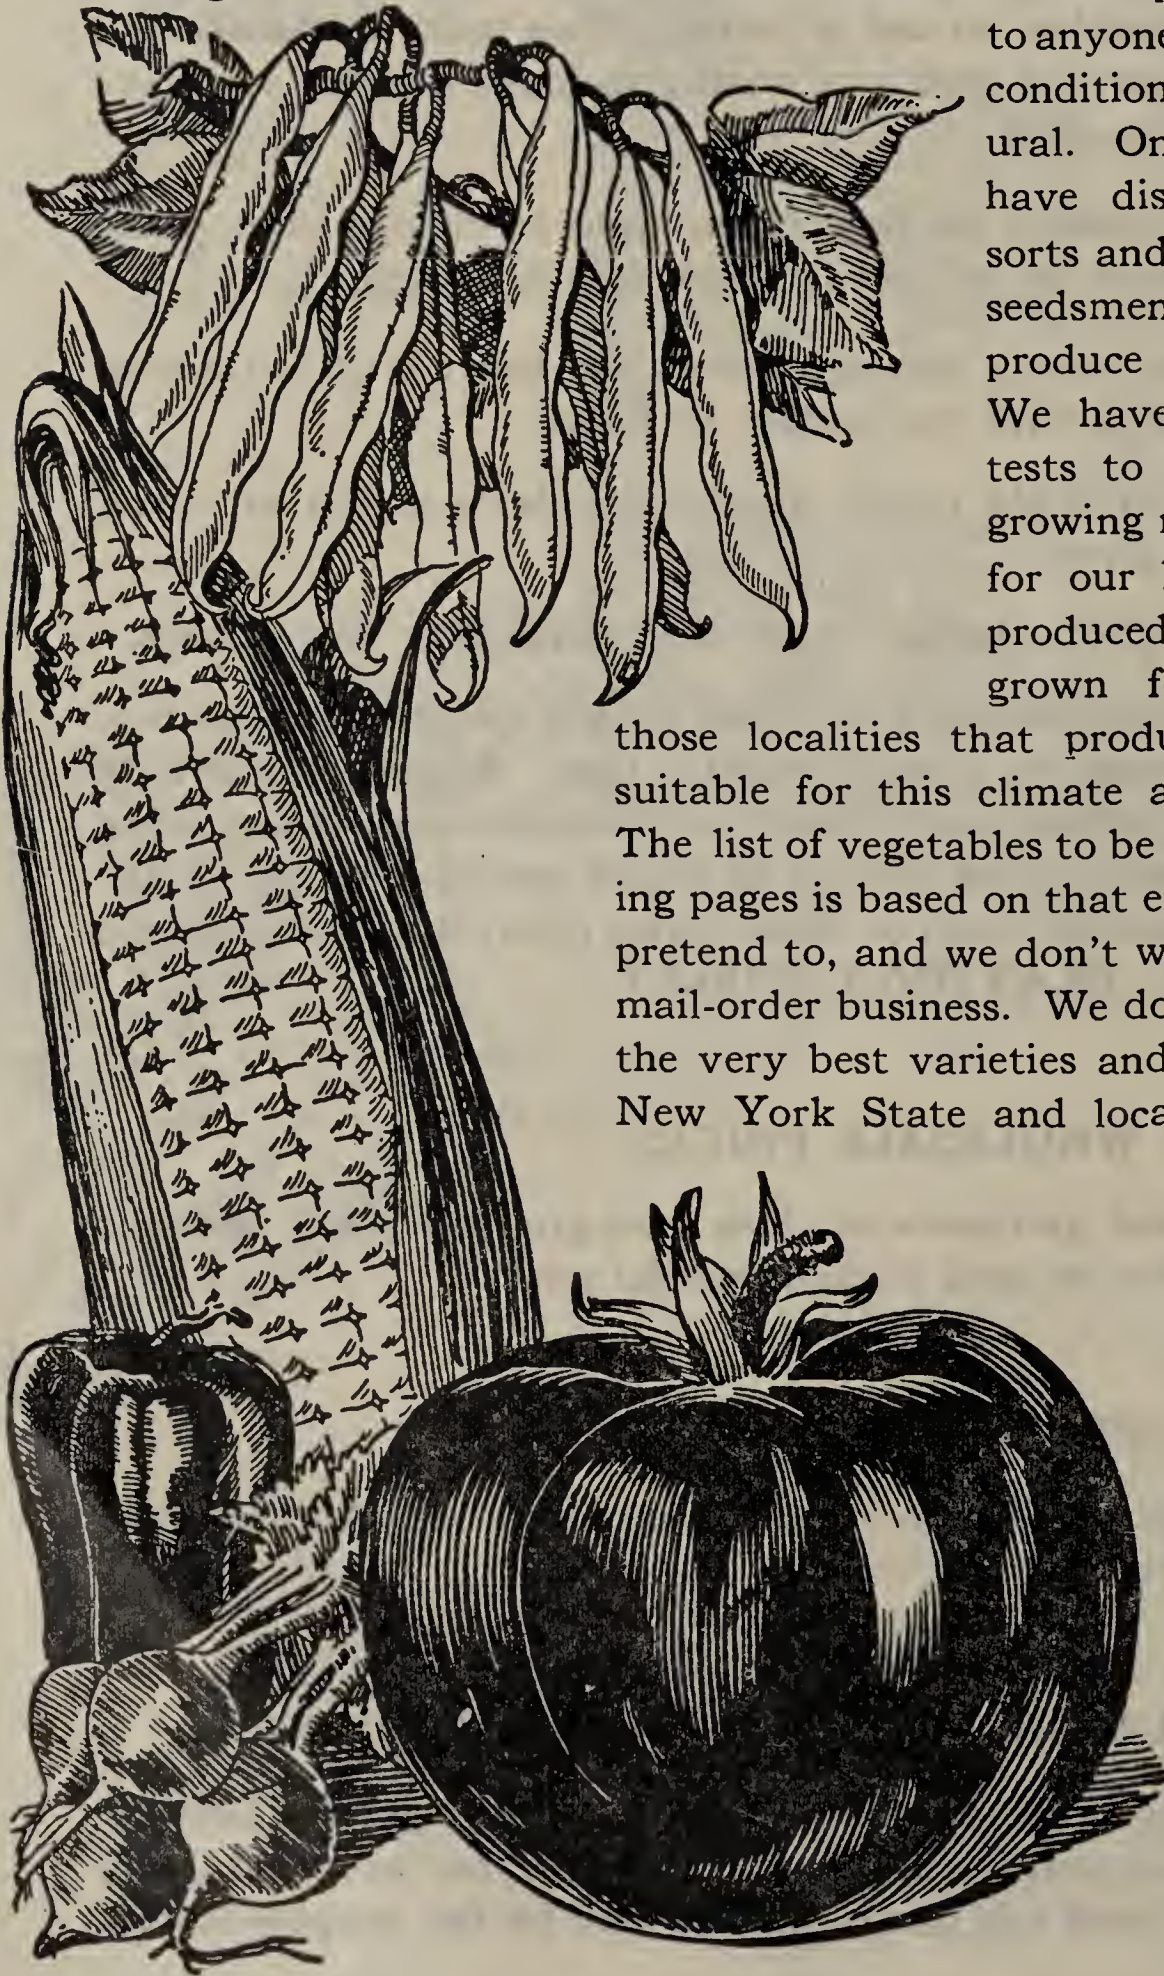

As our part in encouraging the 4-H projects, we have given a discount of one third off and are continuing the same this year, but as we are doing this at cost price, the seeds and plants must be used for the purpose stated.

VEGETABLE SEEDS

Every year for twenty-two years, we have checked and re-checked, tested and re-tested the old standards, the improved strains and the so-called "novelties" in garden seeds, under the conditions of soil and climate that prevail in this central part of New York State. Many of the varieties which give excellent results in other localities are a disappointment here, and

to anyone who knows our local conditions that is only natural. On the other hand we have discovered that some sorts and strains which other seedsmen hardly mention, produce fine results here. We have also made careful tests to determine in which growing region the best seeds for our local conditions are produced, and our stocks are grown for us specially in

those localities that produce the seeds most suitable for this climate and growing season. The list of vegetables to be found on the following pages is based on that experience. We don't pretend to, and we don't want to do a national mail-order business. We do endeavor to supply the very best varieties and strains for Central New York State and localities where similar conditions prevail.

White Spine. Large; good quality; a little late05	.15	.45	1.40
Stay Green. Mid-season; very prolific; dark color, crisp . .	.05	.15	.45	1.40
Davis Perfect Long Green. The old standard shipper. Wonderful producer of excellent quality.05	.14	.45	1.40
Special Dark Green. Extra producer of fine, dark green fruits holding their color well. When known will become a standard shipping variety.05	.14	.45	1.45
Woodruff's Hybrid. By many shippers considered the best.05	.14	54	1.45

CRESS

Curled or Peppergrass. Quick growing; pleasant, pungent flavor. Fine for salads or garnishing.05	.13
Upland Cress. Similar to Water Cress. Excellent.05	.15

DILL

For flavoring pickles.05	.12
--------------------------------	-----	-----

ENDIVE

Broad Leaf Batavian. Forms compact creamy white heads. Very fine.05	.13
White Curled. Finely curled leaves blanching pure white. Very tender, dense heads05	.13
Whitlof or French Endive. Grow the roots in summer as you do carrots and dig them in the fall, cut back tops to about three inches, and plant in box of soil in cellar covering with six or eight inches of loose straw. From these will grow compact heads of pure white tender leaves which make a wonderful winter salad.05	.15

EGG PLANT

Long Purple. Extra early. Why not try it out?05
For plants see page 9	

KALE

Dwarf Early Scotch. Low, bushy; leaves fine curled. . .	.05	.12
--	-----	-----

For a tender winter salad, the Whitloof Endive is delicious and very easy to grow. Have you tried preserving the small plum or pear tomatoes? Oh boy, they are good!

ALL PRICES QUOTED ON SEEDS INCLUDE DELIVERY CHARGES

Budlongs White Rock or Breadstone.. Very sweet, tender white-fleshed winter Ruta Baga. An old favorite....	.05	.10	.25	.80
For plants see below.				

VEGETABLE PLANTS

We grow thousands of Vegetable Plants every year, and the reason is they are of the quality people want. All except those listed as field-grown are transplanted and root-pruned, making stronger root growth and stocky plants. The prices quoted are for plants at the greenhouse or for nearby delivery. If you want them packed and shipped, add 10% to the amount of your order. If you grow in quantity we will take contract orders at special prices but such orders MUST BE PLACED BEFORE MARCH 15th to get the special rates.

- Brussels Sprouts.** Ready about May 15th. Doz. 20c, 100 \$1.25. Field-grown plants ready about June 20th, doz. 15c, 100 90c.
- Broccoli.** Ready about May 15th. Doz. 20c, 100 \$1.25. Field-grown plants ready about June 10th, doz. 15c, 100 90c.
- Cauliflower.** Ready about May 15th. Doz. 20c, 100 \$1.25. Field-grown plants ready about June 10th, doz. 15c. 100 \$1.00.
- Egg Plant.** June 1st. Doz. 35c. Pot-grown, 3 for 25c.
- Cabbage.** May 1st. Wakefield, Golden Acre and Roundhead. Doz. 20c, 100 \$1.25. Field-grown, all varieties listed under seeds, on page 3, doz. 10c, 100 50c, 1,000 \$4.00.
- Celery.** May 15th, Golden Self Blanching and White Plume. Doz. 15c, 100 \$1.00. Later transplanted plants, June 10th, same varieties and also Giant Pascal, doz. 15c, 100 85c, 1,000 \$6.00.
- Parsley.** Pot-grown plants, 5c each.
- Pepper.** June 1st. All varieties listed under seeds on page 6, also a few other fancy varieties in small quantity. Doz. 30c, 100 \$1.75.
- Tomatoes.** June 1st. All varieties listed under seeds, also some others of which we have a small quantity but not enough to offer the seeds this year. Doz. 30c, 100 \$1.75, 1,000 \$12.00.
- Turnip.** June 15th. Field-grown Improved American and White Rock. Doz. 10c, 100 40c, 1,000 \$2.50.

Try our "Try out" Collection of Vegetables. Ten varieties of new and little known kinds, fifty cent value for thirty-five cents.

If you want low price seeds regardless of quality don't waste your time going through our list. Our prices are reasonable but we will not cut them down so we would have to sell second quality.

How are you going to flavor those Dill Pickles? A five cent packet of Dill seed answers the question.

A small amount for seeds, a little good healthful work in spare time, and fresh vegetables all summer.

Don't forget to try some Broccoli this year.

For salads plant Endive and Cress.

Give the children a little garden. They enjoy it and it is just what they need.

What other vegetables can be used in so many ways as the Tomato, either fresh or preserved.

LAWN GRASS

Our formula for lawn grass was especially worked out for the soil and climate here. It is not the lowest priced but it is not half chaff and poor germinating seed. If you want a GOOD LAWN we have the seed; if you simply want a little green, mostly weeds, for such time until it dies out, don't pay the price we have to get, but try something for less money.

R. P. H. Lawn Grass. lb. 45c.

Shady Mixture. lb. 50c.

White Clover. lb. 50c.

Timothy. Ask for prices.

FERTILAWN

We take pleasure in announcing that we have secured the exclusive right for Hamilton and vicinity to manufacture under the direction of the originator and according to the original tested formula, and sell the new combination of lawn seed and lawn fertilizer known as "**FERTILAWN**".

This new product is a boon to the small lawn owner as it combines in one labor-saving package a very superior blend of the very finest and purest domestic and imported true turf grasses with a mixture of fertilizing elements that promote a quick healthy growth of sod and, at the same time, discourage some of the more persistent lawn weeds.

This combination which ensures that the grass seed will receive from the outset the food elements required to establish a sturdy lawn, is one that has been long sought by gardeners and has only now been attained after several years of careful testing.

By using "**FERTILAWN**" you both seed and fertilize your lawn in one simple operation, getting a more even distribution of the seed and a better, more permanent lawn. "**FERTILAWN**" is clean, odorless and easy to sow. One pound will sow 200 to 300 square feet.

Price: 2 lbs. 35c, 5 lbs. 75c, 10 lbs. \$1.25.

FLOWER SEEDS

Gardening is a perennial thrill. To bury tiny seeds in the loam, and then to see the little plants push forth, grow from day to day and finally burgeon into gorgeous bloom, is a delight that never stales.

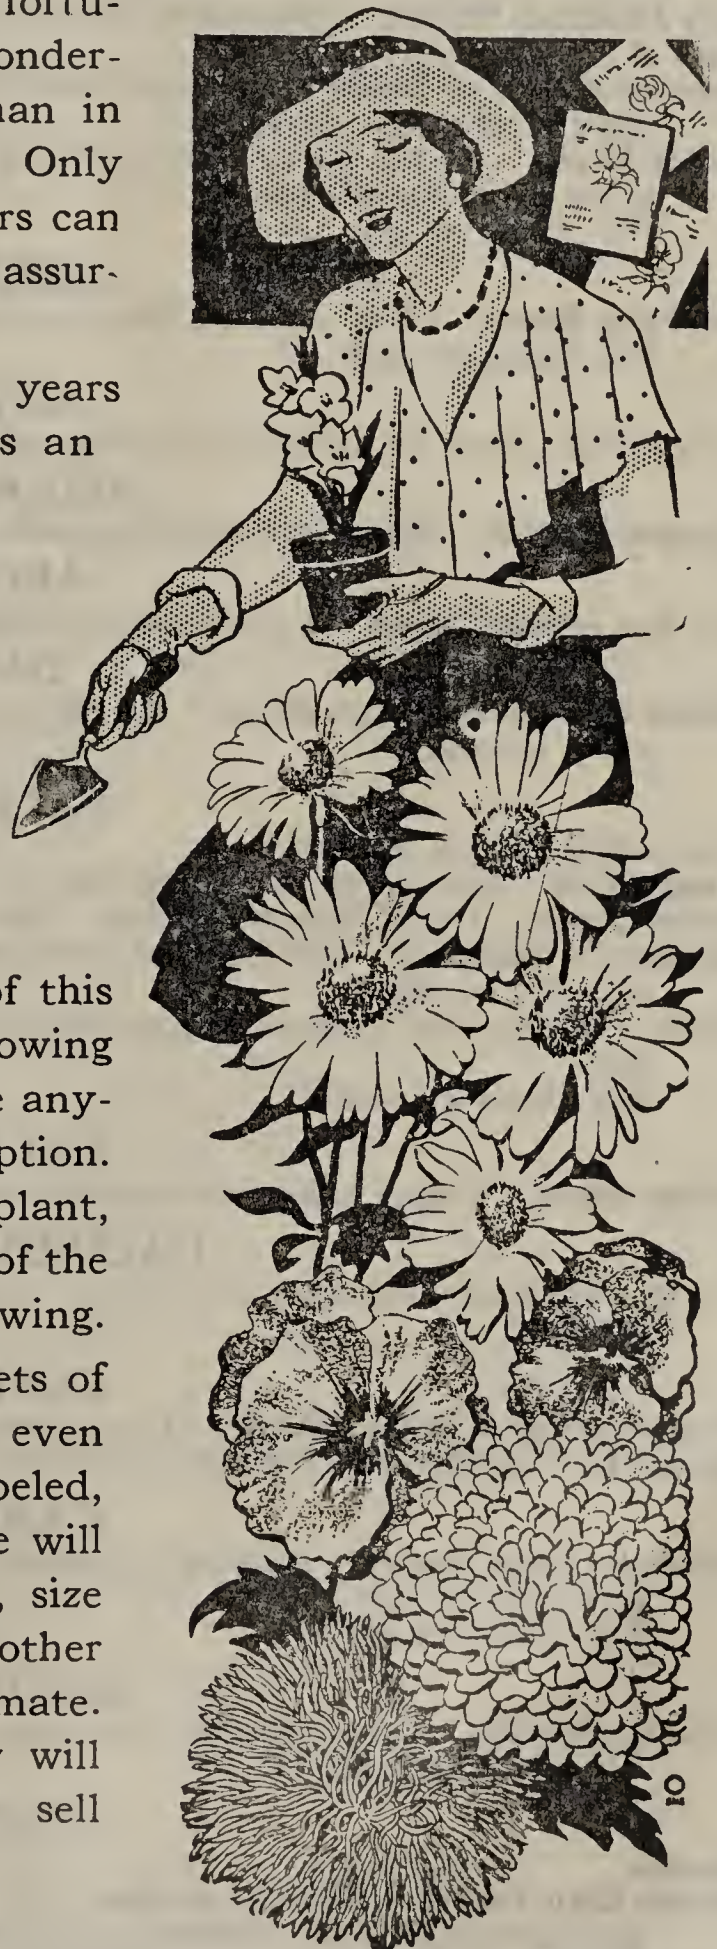

Here in central New York, there are many flowers which we cannot hope to grow to perfection—our season is too short, our soils too slow to warm up in the spring. But there are, fortunately, many other kinds which do wonderfully well—some even better here than in climates supposedly more favorable. Only actual experience over a period of years can determine what one may plant with assurance of satisfaction and success.

Let Us Help For twenty-two years we have been growing flowers indoors and out, from seeds, plants and bulbs. We have tested literally thousands of varieties and strains. We have tried seeds from England and Holland, France and Germany, California and Washington and Michigan, and, of course, New York. During recent years, we have made many trials of Japanese grown seeds.

We hope you will avail yourself of this experience. In the lists on the following pages, space does not permit us to give anything but a very much condensed description. If you are in doubt as to what to plant, please ask us. Let us recommend some of the new types we have found to be worth growing.

A word about quality. Two packets of flower seeds may look exactly alike, even under a microscope; both may be labeled, honestly, with the same name; yet one will contain a heritage of vigor, hardiness, size and abundance of blossom that the other does not possess when sown in this climate. We handle the seeds that we know will give results, regardless of cost, and sell them as cheaply as we can.

CLAYTON E. RISLEY

ASTER

	pkt.
Queen of the Market. Very early, good size flower on good stem10
Royal. Second early large full flower. White, rose, lavender, purple or mixed10
Crego. Large fluffy flower on long stem. White, lavender, deep rose, dark blue and mixed10
